

Latest digital machine spreads rice evenly and perfectly

## Sushi Roll / California Roll Machine

# LCR-700

Sheet Type  
Roll Type

## Smart Roll Machine!

Perfectly rolling and shaping by measuring from small to large amounts of ingredients!

### Feature

- You can minutely control from **rice-layer-thickness and density** to spot-spreading rice shape with the newest, color, touchable LCD monitor. (screen magnification feature)
- Anyone can make perfect rice sheet readily and quickly without being squashed or smashed.
- It is our featured machine, which is capable of producing **any sized (small, medium, or large)** of sushi rolls with smart functions allowing **thickness and accurate location of rice**.
- Efficiency will be maximized with the ability to make various types of sushi rolls.
- The LCR-700 is able to make **warm sushi rolls**, because you can control the process temperature inside of the machine.
- The LCR-700 is a compact-sized model, so it can perfectly fit in small spaces.
- Experience our **"Smart Easy-to-Clean Mode"** installed to the machine, access to disassemble only necessary parts and clean the machine comfortably!

### Expected Users

Convenience stores, lunch box/sushi enterprises, catering enterprises, large supermarkets, department store, express highway rest stops etc.
