

PACSEAL® SKINFRESH

VACUUM SKIN PACKAGING FILM

Our **PACSEAL Skinfresh** offers the latest technology in vacuum packaging. Ideally suited for products such as meat & poultry packaging and ready to eat products where shelf life preservation and optimal presentation is required.

We offer full solution with single cavity starter machines with our FP70 to full auto inline FP55 series where higher production output is required. All our vacuum skin pack systems are installed with German Busch vacuum pump systems to ensure reliability and quality.

Our total solutions also includes the skin packaging trays and sealing film which allows our clients to kick start their product with the shortest turn around time.

FP70

Multilayer Vacuum Skin Packaging film featuring “second skin”, optimum gloss and clarity with excellent formability and sealing characteristics.

TRAY & FILM

RANGE OF SPECIALIZED TOP SEALING FILMS AVAILABLE

- **Easy Peel Sealing Film for PP / PET / PS / PVC / PE Trays** – suitable for general application in ambient, chilled or frozen products such as Jelly cups, beverages and ready to eat meals when convenience is needed for easy opening
- **Non Peelable Film for PP / PE Trays** – Suitable for applications in ambient, chilled and frozen products where an extremely strong seal is required such as tofu and frozen foods
- **Easy Peel Sealing Film with Anti Fog properties for PP/ PET / PE** – suitable for applications such as chilled products, our anti-fog properties ensures optimal clarity against condensation on top film and is typically used in applications such as fresh salads, fruits and vegetables.
- **Soft Shrink Top Lid Sealing Film for PP / PE trays** - suitable for chilled applications where film replicates the traditional feel of cling film with superb clarity and anti fog properties and is typically used in applications such as chilled meats, poultry, fish, fruits and vegetable products
- **High Barrier Top Lidding films for PP/PET/PE trays** – suitable for modified atmosphere packaging (MAP) applications where product shelf life is critical

TABLE TOP COMPACT SEALERS

(BT989 / BT95) Compact, Economical and easy to operate, our range of Bubble Tea Cup sealers are well received by food & beverage outlets who are looking to seal their plastic & paper cups.

BT989

BT95

INLINE ROD PUSHING VACUUM MAP / VACUUM SKIN SEALERS

(FP55) Our FP55 sealers are extremely efficient for mid to high volume production. Easy size change and easily adaptable for different kind of tray and containers. Available as sealing only, Gas Flush Sealing, Full Vacuum and Flush sealing and vacuum skin sealing.

FP55

RAS

ROTARY TYPE SEALERS

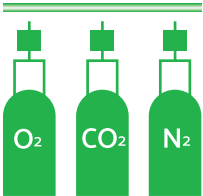

(RAS) The Rotary range is extremely space saving and allows for various options to be included in a compact and reliable machine. The machine can be customized as a full fill and seal machine with options such as auto cup drop, auto fill, sealing station with date coding, snap on cap station and auto ejection.

ET69M/
59L

TABLE TOP INDUSTRIAL GRADE MOTOR TYPE TABLE TOP SEALERS

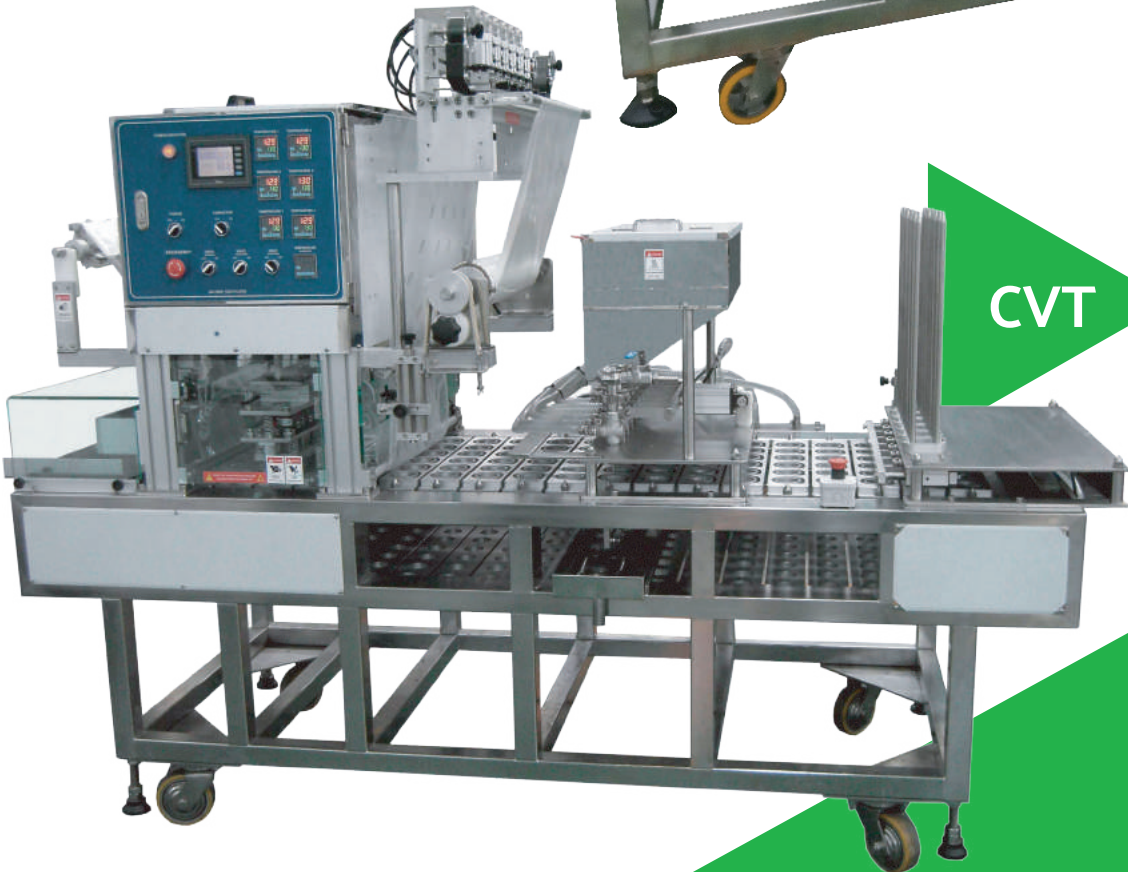

(ET69 / 59L Series) Operating only with electrical power, our motor type sealers are ideal for small production volume and also for food retail shops who requires a leak proof secure seal for their take away trays and containers.

TSA

TABLE TOP INDUSTRIAL GRADE PNEUMATIC TYPE TABLE TOP SEALERS

(TSA 300/400/500/600 GF & Non GF Series) Our range of pneumatic type sealers are industrial grade versions and are widely used in central kitchens and high volume production facilities where flexibility is important. The machine features extremely quick and easy size changes and is also available with optional MAP function where product shelf life extension is achieved with flushing of various gas mixtures.

CVT

CAVITY TYPE INLINE SEALERS

(CVT22/66) - Our cavity type inline sealers are ideal for single size containers offering economy coupled with high output. Several options are available such as auto tray drop, cup rinsing, UV Sterilizer, multiple filling stations for different products, single or twin sealing station and ejection station.

FP56

HIGH SPEED ARM PUSHING SEALERS

(FP-56) - Our FP56 sealers can be easily integrated with existing product conveyor assembly lines, trays are automatically fed via pusher arms taking trays from conveyor belt into sealing station. Standard Features include precise conveyor belt speed and seal temperature control and easy size change over. Optional gas flush function also available.

FFS3L

SACHET FORM FILL SEAL

Extremely economical and easy to operate, the FFS3L is extremely suitable for packaging of liquid and paste products such chili sauces, mayonnaise, salad sauces, honey, lotions, shampoo etc. Available options include date coder, mixer or agitator and double jacketed heated hopper.

WHO WE ARE

UTOOC is an established leading solutions provider of Packaging Equipment and Packaging Materials to the various industries in the region.

Our PACSEAL range of top seal machines provides innovative packaging solutions to suit various production requirements from economical single cup sealers to full line multi lane tray / container sealing machines with automated tray drop and auto filling.

With our comprehensive range trays, containers and specialized sealing films we provide a full turnkey solution to clients who are looking at Top Seal , Vacuum Skin or MAP packaging for their products.
