

Pacseal Table Top Sealing Machine

Quick & Easy Size Change

Upper Mould

Lower Mould

Optional Date Coder (TTO / Ink Jet / Ribbon Type)

Features

The Pacseal TSA series is a table top auto top seal machine for small to medium production scale. The sealing is done pneumatically which ensures a tight and proper seal every time.

Some standard features of the machine includes:-

- Sturdy machine built in stainless steel and anodised aluminum
- Quick and simple size change over
- Teflon coated sealing plates
- External gaurdings for safety
- Accurate film rewinding via sensor, encoder or timer
- Suitable for both plain & printed sealing films

Optional items that can be added to the machine:-
TTO / Ink Jet / Hot foil date coders
